RE: CONFIRMATION OF ALARM REGISTRATION

Thank you for paying your registration/renewal fee for your alarm registration. **Your alarm has been renewed through December 31, 2026** Enclosed is your alarm registration decal. Please peel the decal. It should be prominently displayed at or near the front entrance of the premises, or if multiple units exist at the same physical address at or near the front entrance of the unit for which the alarm registration was issued so that the decal is visible from the outside of the premise.

***Please remember that renewal fees are always due by December 31st each year for the next year.**

We recommend system contacts and batteries be checked annually for necessary adjustment or replacement. Please note that the following are considered incidents and are not excusable: improperly installed or maintained alarm equipment; faulty, defective or malfunctioning equipment supplied by your alarm company; alarms caused by technicians repairing, servicing or testing your system; user error/mistakes by relatives, babysitters, contractors, cleaning crews, maids, realtors, premise caretakers, etc.; items moving which cause motion detectors to activate, such as curtains, signs, balloons, plants, pets, rodents, wildlife; routine weather conditions (wind, rain, lightning); and occurrences where no evidence of criminal activity is present.

BSO and the Pompano Beach Fire Department respond to many false incidents annually with less than 2% being an actual emergency. Please help us reduce this rate through proper use and maintenance of your alarm system. *If you do not feel adequately trained on all aspects of your alarm system, we urge you to immediately contact your alarm company for additional training.*

Working together, we are confident we can reduce the number of incidents in Pompano Beach through proper installation, maintenance, monitoring and use of alarm systems. If you have questions call the above number or email at mary.chick@copbfl.com.

Sincerely,

Mary Chick
 Alarm Billing Technician
